Fig. 2 The pnb base sparse mat class

Multitasking

- Threads
 - pre-emptive
 - single program can have several threads
- Processes
 - .exe
 - a main thread
 - threads share the same memoryspace

Pointer Declaration
 >Computer use their memory for storing instructions of the programs.
 >Pointers are more efficient in handling arrays and data types
 >It allows C to support dynamic memory management
 >It reduces length and complexity of programs

Stack memory c++.
